

Sibling Connections Camp

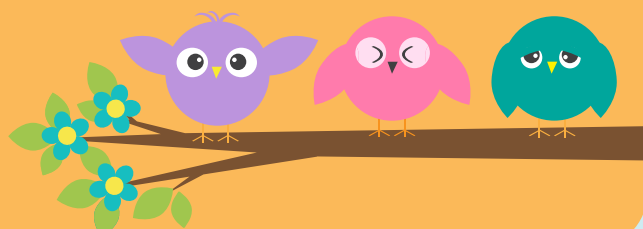

Due to the impacts of Covid-19, Sibling Connections Camp will ensure that all camp aspects are safely coordinated according to CDC Guidelines and the State of CT requirements.

The allowable number of individuals in a cohort at Sibling Connections Camp is currently 14 campers (staff are not counted as part of the 14). The cabins can accommodate 6 campers, with 6 feet of space between.

A positive diagnosis for COVID-19 is reportable to the State. As it stands now, it will require a quarantine. The current guidance is 14 days quarantine. If an individual is positive, they would have to go into quarantine for the remainder of the Sibling Connections Camp session.

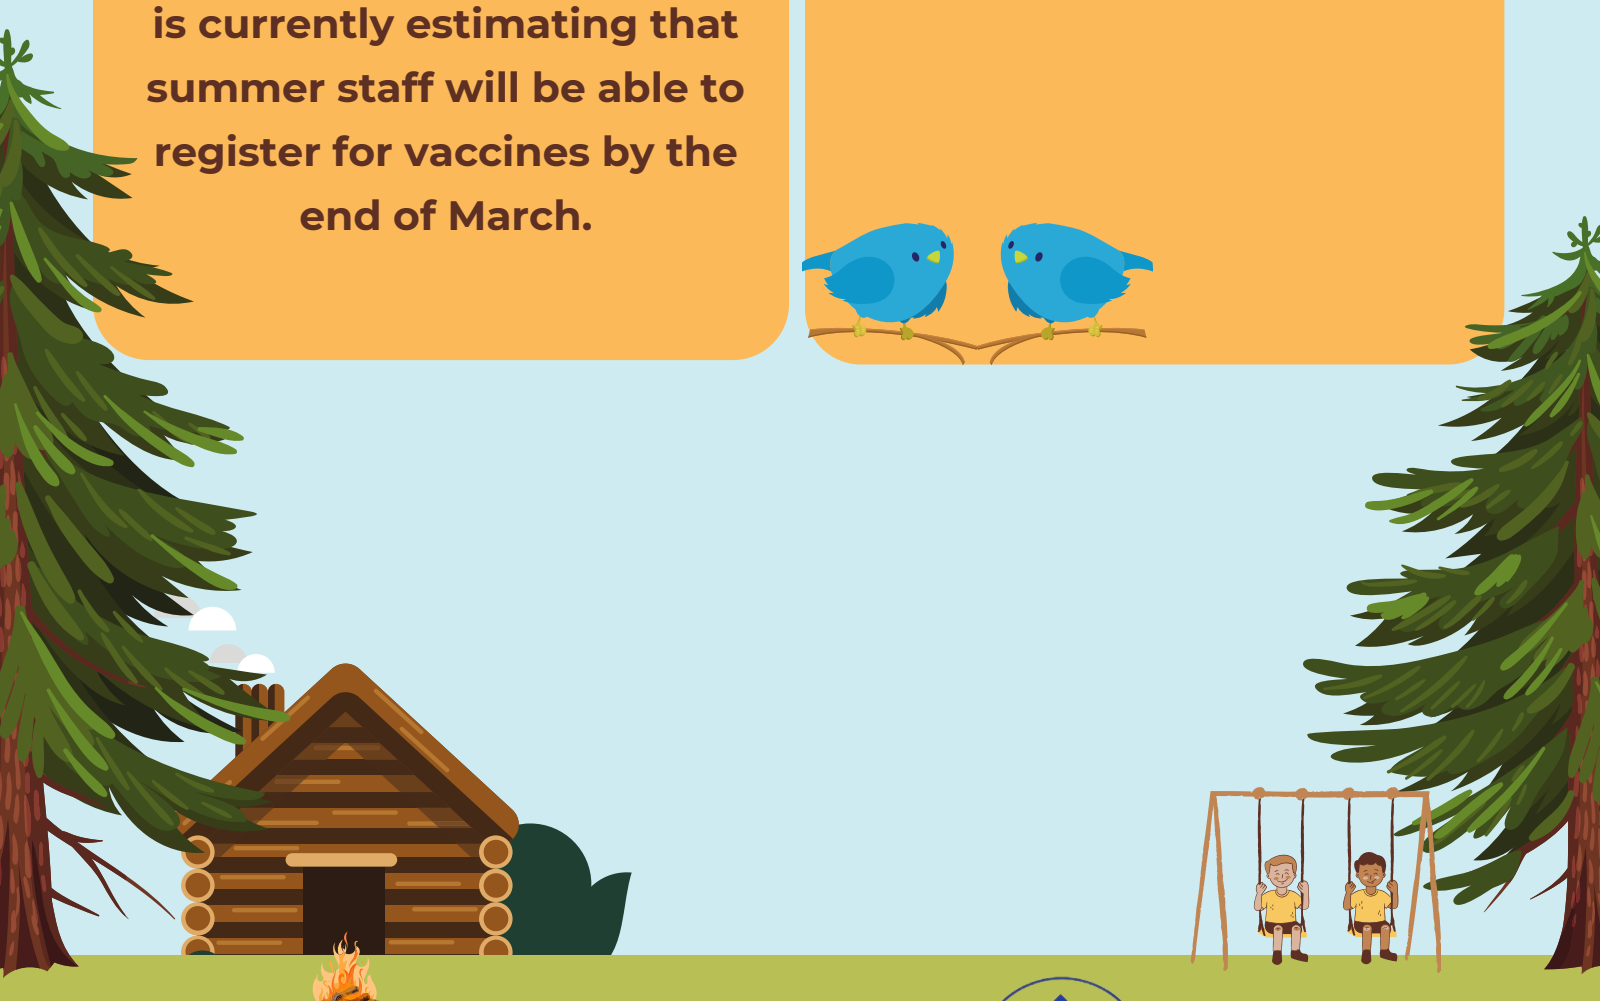

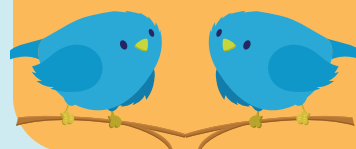

Sibling Connections Camp staff will contact trace any exposure to an individual with a positive COVID-19 test. This would involve the entire cohort, plus staff.

Sibling Connections Camp will continue to staff on a 6:1 ration. Wheeler Clinic has 3 clinicians on site during the day and 1 clinician overnight.

Sibling Connections Camp staff are part of the 1b phase of vaccination. The Department of Public Health is currently estimating that summer staff will be able to register for vaccines by the end of March.

A Social Worker/Clinical Administrator will be hired for Sibling Connections Camp.
